### NOTES

- The Shelllock® collection has natural shells embedded at different distances from the surface of the paver or coping, and then polished. Therefore, a small percentage of the shells are expected to come loose from the surface and edges of the tile. This occurrence will diminish over a short span of time and in no way will effect the strength of the products.
- Pavers should be installed from several pallets at a time to maintain the best color consistency.

## STRAIGHT RELAXED-EDGE COPING
